There is no street light on the second telephone pole[^] from the bottom of the hill / Temple St almost directly across from 83 Temple St. This leaves a large section of Temple St very dark at night leading to potentially dangerous driving conditions and unsafe walking. On behalf of the residents on this section of Temple St. and myself, I respectfully request to have a new street light/fixture installed on that telephone pole as soon as possible. Please note that this is not a request for a light bulb change, but actually a request to have a light/fixture installed where one does not presently exist. Please feel free to contact me regarding this request.

I thank you for your prompt response to this serious issue.

Sincerely,

Ralph DePrenda
