

**LOWELL HIGH SCHOOL ROOF CONSTRUCTION
TRAFFIC PATTERN CHANGE ON KIRK STREET AND PAIGE STREET**

For Immediate Release:

The City of Lowell would like to notify the community of a new traffic pattern on Kirk and Paige Streets.

Beginning **Monday, February 25, 2019 at 7:00 A.M.** through August of 2019, **Kirk Street, from Paige St. to French St., is scheduled to be closed** for the construction of the new roof on the 1922 Lowell High School Building.

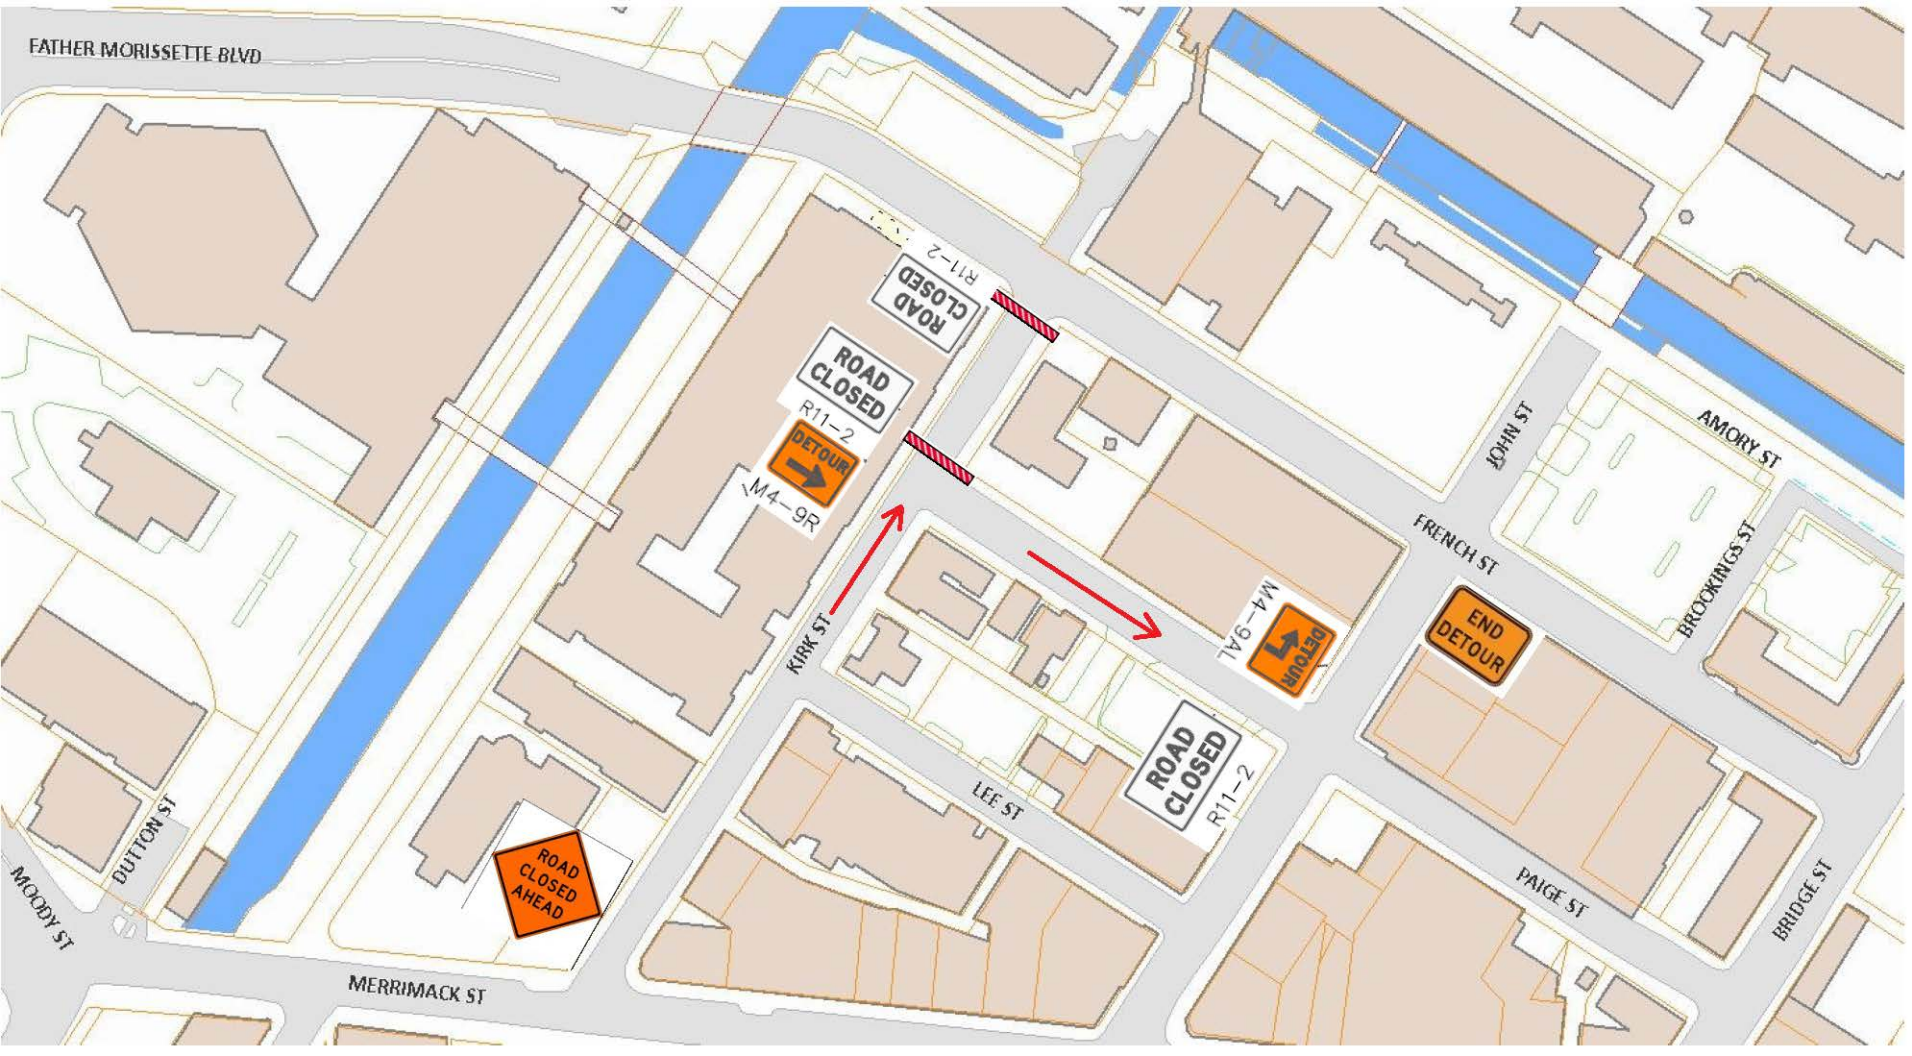

Kirk St. will remain one-way and all traffic using Kirk St will be directed to turn onto Lee St. or Paige St to exit the area instead of exiting onto French St. Paige St is currently 2-way but will be one-way between John and Kirk Streets.

A traffic Detour plan will be in effect with appropriate signage during this street closure. The attached figure illustrates the street closure during construction. Motorists should use the detour or seek an alternate route. Signs will be in place to alert traffic of the closure. Pedestrian traffic will be maintained through this area. This construction is being coordinated with the School Department.

The City of Lowell appreciates your patience during this construction project. Drivers should expect delays, and be prepared to stop and proceed slowly through the detour route. The City reminds everyone to please drive safely.

Please direct all questions and concerns to the Office of the City Engineer at 978-674-4070.
