

September 5, 2014

The City of Lowell issued RFP 15-01 seeking sealed written submittals of qualification statements from engineering firms for services relating to stormwater / wastewater transport and treatment facility improvements. The engineering services include master planning of LRWWU's transport and treatment facilities, as well as design services and construction oversight of the repair, replacement, installation or retrofitting of piping systems, building structures, process machinery, mechanical and electrical equipment, and instrumentation. Eleven firms submitted proposals.

The Project Selection Committee reviewed the eleven proposals received and determined the most advantageous proposal for each project and will award contracts as follows:

Master Planning – Hazen and Sawyer, P. C.
New Pumping Facility (Read Station) – Tighe & Bond Inc
Duck Island WWTP Improvements – Woodard & Curran Inc.
Pump Station Upgrades – Fay, Spofford & Thorndike, LLC
Stormwater Management – CDM Smith Inc

Sincerely,

P. Michael Vaughn
Chief Procurement Officer
