Massachusetts Technology  
Collaborative

The Lowell Green Building Commission in partnership with National Grid and the Massachusetts Technology Collaborative are proud to offer a free half day workshop introducing green building principles and potential funding sources. The program agenda has been developed in order to provide information targeted to the development community with specific relevance to Developers, Builders, and Financial Institutions.

## SESSION ONE

Attendees will be introduced to Green Building principles viewed through the prism of the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) rating system.

### FEATURED SPEAKERS

*Martine Dione*, AIA, LEED AP,  
Director of Sustainable Design/SMMA  
*Fran Boucher*  
Support Representative/Prin Tech.

## SESSION TWO

Resources and funding available from National Grid for implementing energy efficiency measures and renewable energy resources into development projects.

### FEATURED SPEAKERS

*Mike Pace*, Small Business Services  
National Grid  
*Brian Kearney*, Residential Services  
National Grid  
*Marie Raphael*, CEM, Principle Energy Efficiency Consultant  
National Grid

## SESSION THREE

State and Federal resources & grants available for energy efficiency and on-site renewable resources.

### FEATURED SPEAKERS

*Representative from*  
Massachusetts Technology Collaborative
