

12/29/2020 Lowell COVID testing site summary

- Tests
 - 740 testing appointment opportunities
 - 350 testing appointments booked
 - 234 tests conducted
- 6.5 hours of testing- 13 30-minute blocks (930, 1000,1030,1100,1130,1200,1230,1300,1330, 1400,1430, 1500,1530)
- Performance from the public prospective
 - Most times during the day there was zero wait (other than the processing time at the stations)
 - We processed testing for any Lowell resident that came to the site.
 - We didn't have a need to hold people to their appointments time. So we tested as soon as people arrived.
 - Our first test of the day was conducted at 0904. These 4 people had a 1030 appointment.
 - Timing
 - We timed 5 clients throughout the day. (With so little wait times we didn't find it useful for most of the day.)
 - We would document the below times on a colored index card and put them on the patients windshield. Then taken them off once finished testing.
 - We noted the patients
 - Appointment time
 - What time they arrived
 - What time where able to leave
 - The results
 - The longest documented wait was 12 minutes.
 - The average wait for these 5 people was 9:34.
- Testing outcome
 - The couriered pick up the testing from Trinity at 22:00 12/29/2020
 - The first results were completed and emailed to the patients at 11:45 on 12/30/2020
 - There were 9 positive results. This is a 3.8%positive rate
 - The last positive patient was notified or contacted by noon on 12/30/2020
