

Check the **EXPIRATION DATE** on your Narcan. Narcan becomes less effective past date.

Narcan **FREEZES** at 32°F. Its effects may weaken after prolonged exposure to cold temperatures. When it's cold out, keep Narcan close to your body to reduce chances of freezing.

EASY and **IMMEDIATE** access to Narcan during an emergency can prevent a fatal overdose. If you or someone that you spend time with is at risk of overdose, keep Narcan close, like in your jacket, purse, or backpack.

The effects of Narcan wear off within 30-90 minutes of administering. **CALLING 9-1-1** before administering Narcan can prevent additional health risks.
