For consideration at the July 13<sup>th</sup> City Council meeting:

Solicitation should be banned in the city—as a taxpayer and homeowner of a property that has had to put up several No Trespassing signs on my property because of bad manners by individuals that need to be told to keep away from us—only to have the city give a license to people to do exactly that is ridiculous. They basically are selling away our privacy and subjecting us to looting and damage to our property by saying it is ok for these people to do this trespassing. I think it's ridiculous to think one must build a fence and locked gates to keep out unwanted people and then make us do the work by writing letters and asking for the city to put a stop to this. One letter about this is ridiculous especially since I now have 4 No Trespassing signs and either no one can read or they just know in this city it means nothing.
