Work to be Performed:  
**Mon- Fri: 8AM -2PM**  
(Except when otherwise posted)

Lowell Water Utility will be performing yearly hydrant flushing in the Belvidere section of the City. Please be advised during the flushing of hydrants, residents may experience a drop in water pressure, as well as some discoloration of the water.

We apologize for any inconvenience this may cause our residents. This is a very important system maintenance procedure that is conducted each Spring/Summer. The flushing program allows the water mains to be cleaned and the hydrants to be checked for proper operation.

Although the water is safe to use during this time, residents should refrain from doing laundry when the water is discolored. You should also, avoid running the hot water, as sediment can accumulate in your water heater. Following hydrant flushing in your area, all residents should run the cold water in the bathtub or sink, until the water runs clear, before returning to normal use.

Please contact the Lowell Water Utility at (978) 674-4242 with any questions or concerns you may have. Additional information can be found on our website listed below.
